Summary

I am a result-driven Web developer who loves to build web-based software applications, with an educational background in project management, various certificate programs and work experience in administration and technology industry, which has equipped me with an evergreen arsenal of modern technologies not limited to web development, to efficiently execute projects collaboratively or singlehandedly, in-person or remotely.

I have been able to employ the use of HTML5, CSS3 (Bootstrap, SASS), and JavaScript (React) to build SPAs as well as MPAs on various projects, this has familiarized me with Version Control Systems such as GIT and Agile/ DevOps frameworks

I am open to learning new technologies to evolve with the tech industry and ease my development workflow, such technologies include but are not limited to React-Native to be able to build native applications.

I see myself as an outgoing, detail-oriented, self-motivated person of good character, willing to apply my skills, acquire knowledge as required to suit my work environment and culture.

Experience
